* We care

The plant pots from Lundegaard are 100 percent kerbside recyclable they circulate completely 360 degrees back to the beginning, from production, use and disposal to kerbside recycling in the material loop. At least 80% of the pots composition comes 100 percent from household kerbside recycling collections as certified by the RAL quality mark. You recognize them on the blue colour.

MPS - Lundegaard is certified under the The MPS Group. MPS develops and manages certificates. Certificates ensuring sustainability in the horticultural sector are becoming increasingly interwoven in companies' daily activities. The MPS standards are internationally accepted and serve as a guide in the horticultural sector. Not only is the focus on the environment here. With its certificates MPS also gives shape to sustainability in the field of quality care and social aspects. Accordingly, MPS offers the sector 'tools' to implement corporate social responsibility in the correct way.
